

Since its founding in October 2018, the Family Medicine Center (CMF) has strived to become a pillar for primary healthcare in Lebanon.

## Mission

CMF's mission is to provide accessible, continuous, comprehensive, and patient-centered healthcare at all ages.

## Vision

CMF's vision prioritizes the provision of comprehensive and continuous care, within a team-based approach, under the leadership of a family physician and in partnership with the patient and their family. It embraces the crucial role that family physicians and family medicine practices play in the healthcare system and is based on the fact that systems with strong primary healthcare have better outcomes, greater efficiency and better quality of care.

## Our areas of expertise

- Providing primary care to patients of all ages
- Conducting periodic medical examinations
- Administering vaccination plans based on national and international recommendations
- Monitoring patients after an acute care episode
- Offering health prevention and promotion activities
- Providing specialized consultations in travel medicine
- Making our expertise available to the Ministry of Public Health and other partners
- Serving as a training and clinical research facility for Family Medicine residents

## The CMF clinics

- The Primary Care Clinic (CSP), which joined the network of primary health centers of the Ministry of Public Health in December 2021.
- The Social Pediatric Clinic (CSE)
- The USJ Clinic
- The Travel and Vaccination Clinic
