

**Campus Where The Program Is Offered:** CIS

## OBJECTIVES

---

The PhD in Economics aims to provide advanced training in research and innovation, focusing on economic theory and applied quantitative methods. It emphasizes research methodology and scientific publishing, equipping PhD candidates to advance knowledge in their fields. The program also offers professional research experience and supports international career development through thesis co-supervision.

## ADMISSION REQUIREMENTS

---

Candidates must hold a Master in Economics or equivalent, submit a thesis proposal, and undergo an application file review.

## PROGRAM LEARNING OUTCOMES (COMPETENCIES)

---

- Conduct research on economic issues with a critical approach.
- Develop innovative projects with economic impact.
- Present research findings effectively to an audience.
- Publish research articles.
- Use econometric models to analyze and solve economic challenges.
- Advance knowledge in the chosen specialization.
