

HIGHER INSTITUTE OF PUBLIC HEALTH (ISSP)

HISTORY

The Higher Institute of Public Health (ISSP), an institute affiliated to the Faculty of Medicine, was created by the University Board on September 16, 2016. Its official launch took place as part of the fourth edition of the “*Printemps de la Faculty de Médecine*” event, which took place on Friday, June 2, 2017.

The establishment of the Institute is based on solid foundations drawn from 20 years of experience in the field of public health, through academic programs, training sessions, and research and consulting activities carried out by the Institute of Health Management and Social Protection (IGSPS).

MISSION

The Higher Institute of Public Health (ISSP) aims to train future leaders and agents of change in public health, who are capable of improving the health status of populations and communities and promoting health equity through innovation and excellence in interdisciplinary education, research, expertise, service, and community engagement.

VISION

Be recognized as a center of excellence and reference in public health, nationally and regionally.
