

# PMP® Project Management Professional

FOLLOWING PMI STANDARDS,  
ENRICHED WITH AI TECHNIQUES.

**The Professional Training Center (CFP) is an Authorized Training Partner (ATP) with the Project Management Institute (PMI).**

As an ATP, CFP is officially recognized by PMI to deliver training aligned with global standards in project management. This ensures that our programs follow PMI's quality requirements, use PMI-developed course materials, and are taught by instructors who are vetted and approved by PMI.

# Comprehensive PMP® Training Program

Advance your project management career and take the first step towards PMP exam preparation with a comprehensive PMP training program, aligned with the latest PMBOK® Guide and Agile Practice Guide.

The course is designed for professionals seeking PMP certification and/or strengthening their Project Management skills, this course blends essential concepts, real-world case studies, hands on practices and an exclusive introduction to AI tools that can enhance project performance.

A photograph of three business professionals in an office setting. Two women and one man are gathered around a tablet, looking at the screen with interest. The woman on the left is wearing a brown blazer over a white blouse. The woman in the middle is wearing a white blouse and large hoop earrings. The man on the right is wearing a dark suit and tie. The background is a blurred office environment with large windows.

# Who Should Attend

- Professionals seeking PMP® certification to advance their careers.
- Project Managers from any industry looking to formalize their skills and gain a globally recognized credential.
- Team leads, coordinators, and supervisors.
- PMO members or program coordinators preparing to take on larger responsibilities.
- Professionals transitioning into project management roles (e.g., business analysts, engineers, software developers, operations leads).
- Consultants and freelancers looking to boost credibility with PMP certification.

# Learning Objectives

- Integrate the principles and performance domains in PMBOK, and be ready to kick off your journey toward PMP exam.
- Learn Agile, Waterfall, and hybrid approaches to project delivery.
- Get familiar with tools and techniques with hands on practices and case studies.
- Learn how to apply project management techniques in real-world scenarios.
- Gain exposure to AI tools that support project planning, scheduling, tracking, and reporting.

# Learning Outcomes

- Pass the PMP® certification exam.
- Demonstrate a deep understanding of both predictive and adaptive project environments. (Agile, Waterfall, and hybrid)
- Translate PMP frameworks into practical tools for managing projects efficiently.
- Apply emerging AI technologies to improve project insights, productivity, and decision-making.
- Build confidence in leading and delivering successful projects in any industry.

# Modules

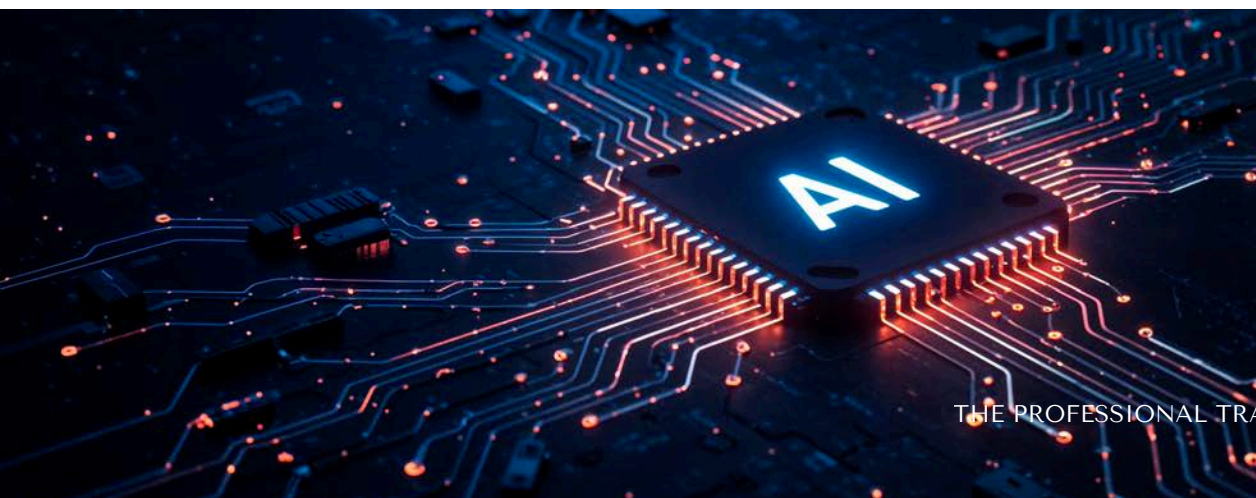

## **Agile Practice Guide\***

- Introduction to Agile: Agile mindset, values, principles, and suitability for exploratory projects.
- Life Cycle Selection: Predictive, iterative, incremental, agile, and hybrid approaches.
- Creating an Agile Environment: Servant leadership, team support, and PM role evolution.
- Delivering in Agile: Backlogs, stand-ups, retrospectives, and value-driven delivery.
- Organizational Agility: Culture, change management, procurement, and PMO alignment.
- Continuous Improvement: Encouraging feedback and ongoing refinement of practices.

## **PMBOK® Guide – Seventh Edition\***

- Project Management Fundamentals: Key concepts, terms, and value-focused outcomes.
- System for Value Delivery: Portfolios, programs, projects, operations, and information flow.
- Project Management Principles: 12 guiding principles for decision-making, leadership, collaboration, and adaptability.
- Project Performance Domains: Stakeholders, team, development approach, planning, execution, delivery, measurement, and uncertainty.
- Tailoring: Adapting methods, processes, and tools to fit project context and environment.
- Models, Methods, and Artifacts: Practical frameworks, templates, and techniques to structure, execute, and communicate project work effectively.

*These modules are based on the Agile Practice Guide and the PMBOK® Guide, which participants may purchase online.*

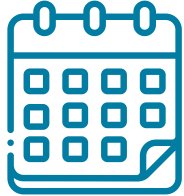

# Training Approach

- Problem → Analysis → Solution learning framework.
- Engaging methods: visuals, storytelling, and short videos.
- Interactive workshops with AI tools and PM applications.
- Flipped learning: pre-class videos, in-class discussions, post-session reflections.
- Hands-on practice: case studies, real scenarios, and team-based activities.
- Peer sharing of expertise to enrich learning.
