■ Presentation and Objectives

This program aims to develop students' management skills and prepare them for executive positions in companies across various sectors, with a particular focus on general management aspects. The master's program is led by high-level instructors, renowned for their diverse backgrounds and extensive experience in teaching, research, and professional practice. Driven by a common vision, our instructors strive to create a stimulating learning environment by integrating case studies, practical experiences, and innovative content. Professional speakers are regularly invited to contribute to various courses. At the end of this program, students earn a master's degree in business and management with a concentration in Management.

■ Curriculum Program

First year

Business Plan	Research Methodology
Business Policy	Quantitative Research Methods
Corporate Communication	Specialization Seminar
Human Resources Management	Elective courses
Decision Making in Business	Thesis Project

Second year
