

First Year Student Satisfaction Survey 2022 - 2023

As part of its satisfaction surveys, USJ has conducted a survey among its one year students for the 2022-2023 academic year, in order to provide answers aimed at improving the quality of its services and orientation.

The survey was administered via the Internet between between May and July 2023, among a population of 2224 young students. 328 students responded to the survey, giving a response rate of 14.7%.

The tested and validated online questionnaire contained 45 questions covering various aspects, including the selection of university and program, academic integration and performance of new students, student life (sports, associations, etc.), accompanying policy, information sources, general information, and finances.

Responses to open ended items (qualitative data) were grouped into themes and coded to facilitate quantitative analysis.
