

Guidelines for Presenting Assignments (TPC)

Assignments, Projects, and Internship Reports

This concise guide, revised according to the Publication Manual of the American Psychological Association (APA): 7th edition, 2020, provides fundamental formatting guidelines for academic papers and essays.

Guidelines

1. Title page includes the following elements (see Appendix A):

- University Logo
- University Name: Saint Joseph University of Beirut
- Author Affiliation: Faculty of Educational Sciences
- Course Name
- Paper Title
- Author Name
- Instructor Name
- Assignment Due Date
- Page Number

2. Table of Contents: is usually generated after the title page. It can be particularly helpful in case the written work is lengthy (more than 10 pages).

3. Formatting:

- Set the left margin to 3 cm, and the top, bottom and right margins to 2.5 cm (See Appendix A).
- The text is aligned to the left margin. The right margin is left uneven, or ragged.
- A variety of fonts are permitted (11-point Calibri, 11-point Arial, or 10-point Lucida Sans Unicode, 12-point Times New Roman, 11-point Georgia...), however, it is recommended to use "12-point Times New Roman".

- When the assignment is printed, opt for printing only on the front and not back.
- The line spacing is 1.5, according to USJ, between all text lines of the manuscript.
- The first line of each paragraph is indented 1.25 cm from the left margin.
- In the footer and on the left side, add the following "Fsédu-USJ", in 11-point "normal" font style.
- The page numbers, displayed in 11-point Arabic numerals, are generated automatically by using the page number 1 on the title page. Use the automatic page-numbering function of your word processing program to insert page numbers in the top right corner of the page header.
- Footnotes provide additional content that supplements the text.

4. In-Text Citations:

- In-text citations have two formats: parenthetical and narrative.
 - In parenthetical citations, the author name and publication date appear in parentheses, Example: (Jensen, 2005).
 - In narrative citations, the author name is incorporated into the text as part of the sentence and the year follows in parentheses. Example:

Koehler (2016) noted the dangers of falsely balanced news coverage.
- When quoting directly, always provide the author, year and page number of the quotation, in both parenthetical and narrative in-text citations.
 - Parenthetical citations example: (Jensen, 2005, p. 60).
 - Narrative citations example: According to Jensen (2005), for students to succeed, "they must have a good image of themselves" (p. 60).
- When multiple pages are referenced, "pp." will be used instead of "p." (pp. 60-61).

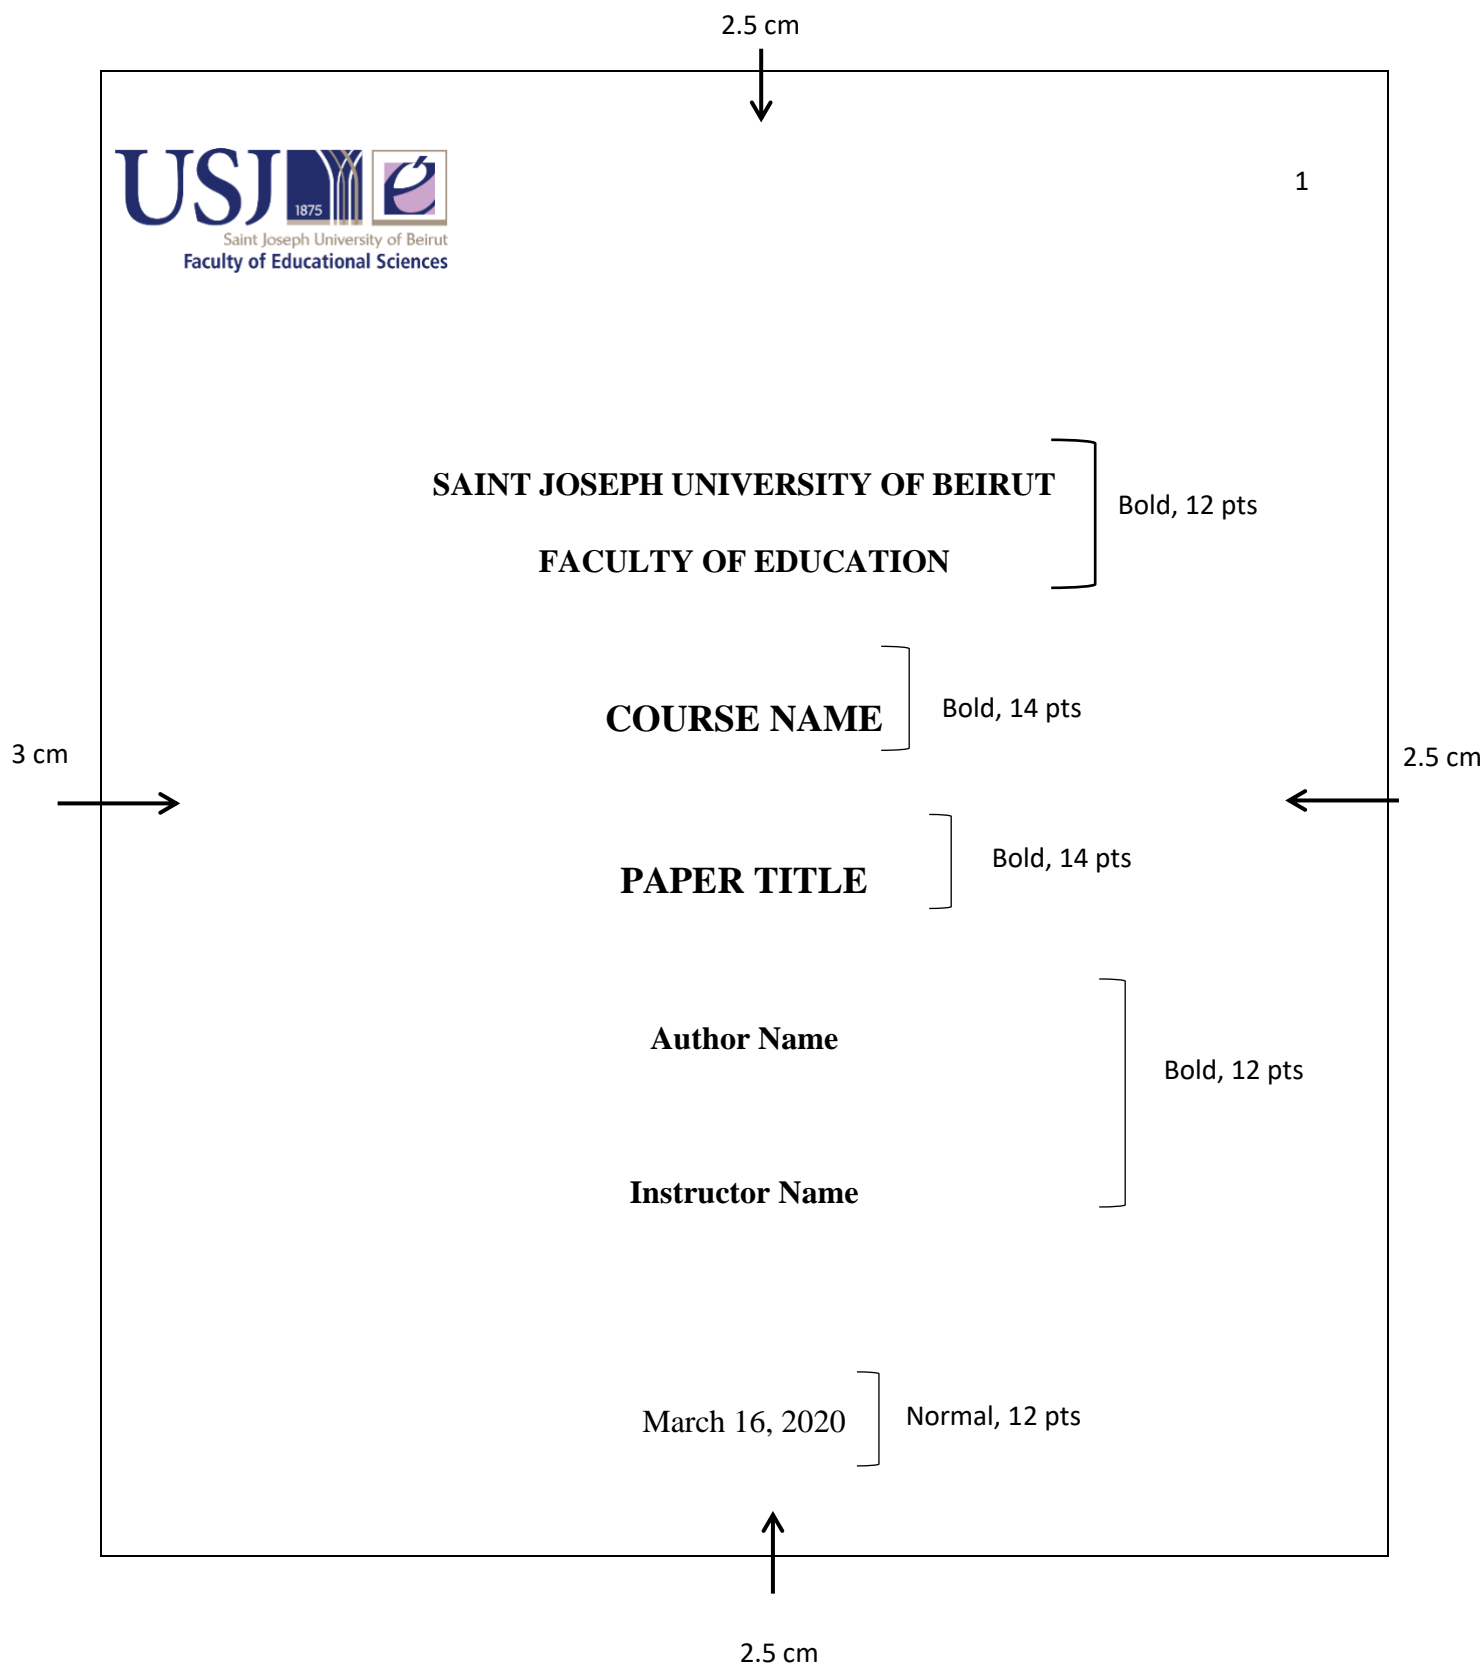

5. References:

- References are listed in alphabetical order of author's surnames regardless of the reference type (book, article, website...).
- Each entry in the reference list has a hanging indent, so that the first line of the entry is flush with the left margin, but all other lines are indented.
- For further information regarding referencing, please consult: www.apastyle.org

6. Appendices:

- Appendices are additional complimentary parts that are announced in the text in a chronological order.
- They are usually placed at the end of the document, in that same chronological order, after the references, where each appendix is found on a separate page.
- Their respective titles are arranged in the manner of a chapter title (Heading 1) as Appendix A, Appendix B...
