Pre-emptive Cyber Security

Hack yourself before others do

CONSULTING POTECH **Berytech** Nurturing Innovation **USJ** 1875

# PCST2016   F /PotechConsulting   t /PotechC

Pre-emptive Cyber Security Training is designed to educate information technology practitioners on the appropriate methodologies, mentalities and tools of hackers in order to discover and understand the existing risks in information systems; Assessing the system security is done by examining and exploiting it.

This training is aimed for Security Enthusiasts, Developers, IT and IT Security staff to raise their security maturity level and help them build a performing, secure and resilient information system.

EACH TOPIC EMPHASISES ON:

Threats, Tools & Techniques
Assets affected in case of breach in terms of Availability,
Integrity and Confidentiality concepts
Best practices to mitigate risks
Real life workshops, Demonstrations, Hands on Labs
